### SUMMARY

Full-stack developer with 2+ years building enterprise software for an AS9100D-certified aerospace manufacturer. Member of the team that designs and runs the company's custom ERP in TypeScript (React, Node.js, Prisma, MySQL), integrated with Infor SyteLine and Microsoft 365. Focused on secure APIs, clean interfaces and automating real business processes. Final-year Software Engineering student (UTN). English B2.

### EXPERIENCE

**Application Developer (Full-Stack) · TechShop Internacional S.A.** Jun 2024 – present

*AS9100D-certified aerospace manufacturer. Full-time employee since May 2026; contractor for the same company before that.*

- Co-built the company ERP in TypeScript: 100+ modules, 1,800+ REST endpoints and 400+ MySQL tables, replacing 14 Power Apps, 10+ Power Automate flows and 9 Power BI dashboards.
- Built a bilingual React 19 + Tailwind SPA (400+ routes) on an in-house design system, with BI dashboards, Excel-like grids and real-time updates via Server-Sent Events.
- Migrated 440K+ historical records into MySQL with a Python/PowerShell ETL (99.7% valid rows).
- Integrated Infor SyteLine (SQL Server), Microsoft 365 (Graph API, Entra ID OAuth 2.0) and Costa Rican government services (Hacienda e-invoicing, BCCR, CCSS).
- Implemented defense-in-depth security: JWT with rotating refresh tokens, role-based access control with 400+ permissions, audit trail and rate limiting (self-assessed against OWASP ASVS L2).

### PROJECT

**SNFinance · Founder & Developer** May 2026 – present · snfinance.app

- Local-first personal finance Android app (React 19, TypeScript, Capacitor, Firebase) supporting 15 countries' currencies; in Google Play internal testing.
- Hexagonal architecture, lossless multi-device sync and ~2,900 automated tests in CI (GitHub Actions, Semgrep).
